

Dear Commissioner Heaney,

We need to ban RB6K as in Europe and Canada. Government

Subsidized agricultural chemicals are  
seemingly to bring us to extinction.  
exterminate the family farm. this  
needs to stop. I'm sick and tired  
of large scale agriculture killing the  
small farm. it seems like every day  
my properties taxes increase and get  
offered on my pastures by housing developers
